Price List 2011/12

Prices for accessories - see separate price list
 excl. V.A.T.

All shade sails are made of acrylic awning fabric made by Dickson-Constant. The side edges are reinforced throughout with a strong strap, which is additionally hemmed into the awning cloth. In the corners, steel rings are set into this strap for fastening.

Butterfly shade sail

Attractive and practical. A canopy with many uses: in the garden, for a party, by the pool, in a children's playground or wherever required. Quick to put up and take down.

The sail is erected using 2 galvanised steel poles (3m long; in 3 parts for assembly) and 4 ground anchors with tensioning ropes. All accessories are included in the price.

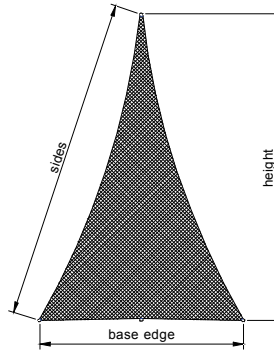

If you want to use the Butterfly shade sail as a permanent fixture you should use poles with base sleeves and concrete foundations. These can be found in our price list for custom-made designs.
